HELP!

We've Got A Problem...
The Old Makes Possible the New

When dedicated persons, with vision, chartered Columbia College for Girls in 1854, they established more than a girls' school. They began a tradition, in education but more importantly in Christian womanhood, which in the course of time has become fact and fibre not only of those who were first students, and then alumnae, but which has influenced the thinking and the ideals of ever-widening circles who have been taught by, touched by, changed by = COLUMBIA COLLEGE.

Today's Youth are different, we are told. No; there are just more of them! Their ideals are the same, but their ideas for the future are bursting at the seams. Woe to the college which is not ready for them ... BUT! Classroom space is already at a premium, nationwide, and it is clear that by 1970 we will need TWICE as much room alone, to say nothing of trained instructors and widened curricula freshly in the making every day. These are the "burgeoning" years, everywhere — most painfully so in our Colleges.

The Fire Produces the Challenge

The Fire, on February 12th, was a major disaster, wiping out not only loved landmarks but space already in short supply. The result is not simply a need to "replace" the old, and to relieve the "wall-to-wall" bedding, but to provide for the growth already envisioned by all who read the signs of the times.

To begin that growth, space is needed for 100 additional resident students! This, along with the necessary replacement of a burned Administration Building and Dormitory, plus a new Library large enough to keep up with the times. Two buildings have already been started — ON FAITH — at the west end of the campus. The challenge is accepted.

The City of Columbia Opens the Door to the Future

The cost of the first segment of this New Columbia College is calculated at $1,200,000. This (aided by insurance on the burned structures) will replace old with new buildings, retaining the "Old Look" of our tradition ... Columbia College is a big part of Columbia itself — a part of which every citizen is proud! Entirely separated from any "state" connection, it is OUR COLLEGE.

The total foreseeable cost of the New Columbia College is $5,000,000, if we are to increase our present enrollment and serve them properly. This means that, in the fall, and following Columbia's first $1,200,000, there will be a statewide opportunity for wider echelons of alumnae and friends to add a second million dollars, and to keep the direction ... FORWARD!

The Goal

The eventual service to community, to state, to nation, will not be just educated young women, to perform more capably the score, or hundred, special services for which they have been trained. They will be DEDICATED WOMEN, the hope and the future of America!
